

Pineline Fusion Essence

Art.nr.	860	
Description	Ceramic WetCoat developed for wash tunnels and Roll-over machines to protect the car's exterior, glass and metal surfaces.	
Special features	The SiO ₂ structure of the product offers long-lasting protection and repellency against dirt. The coating retains its properties even after several washes. Thanks to its excellent hydrophobicity, dirt is easily washed off from surfaces. The gloss also deepens.	
Instructions for use	Concentration 0,5 – 1 %. Typical consumption: - 40 – 70 ml / passenger car A separate fresh water rinse is recommended before air blowing.	
Note!	Read the instructions for safe use on the label or Safety Data Sheet. Store sealed at +5...+ 30 °C.	
Working environment	Provide adequate ventilation.	
Technical data	Form and colour pH-value (20 °C) Relative density	clear liquid 5 1
Content	Polyorganic siloxanes	5 – 15 %
Package	10 L, 25 L. Empty and rinsed packaging shall be delivered to plastic collection.	
Other	Made in Finland.
